## **Introduction**

The website we have decided to create is an online food delivery system catered to Japanese cuisine. We aim to create a sleek, simple, and easy to use website which allows users to easily view and order at their leisure. To use the website, users must first login or create an account if they don't have one. Upon logging in, the website features a user-friendly interface with functions such as menu browsing, ordering, order cart management, payment processing, and order keeping. Furthermore, users can find more information about our restaurant as detailed on our website. If customers wish to get in touch with us, they can fill in the contact us form or reach us through the email and telephone number listed on our website. Users of the website will customers who wish to order from our restaurant through the use of the website.

With a focus on authenticity and quality, our platform offers all types of mainstream Japanese dishes such as sushi, ramen, udon, tempura, sashimi, tonkatsu, and more. Furthermore, customers can order specialty desserts from Japan such as Doriyaki, Anmitsu and more. Customers also have the choice of unique drinks such as Sour Plum Drink, Three Layer Tea and more. The website is designed with a light brown palette to emulate the tranquillity of Japanese woods and ensure that users can feel relaxed in the natural sophistry and elegant design of Japanese culture.

## Project Background

For this assignment, our group wanted it to be a passion project, in which that we can all work on something that we all collectively enjoyed. Our team has always been passionate about Japanese culture, and we noticed a growing demand for authentic Japanese cuisine in our local area. As our area is further from the city centre, many people find it difficult to access affordable, yet high-quality Japanese food without leaving their homes as delivery costs tend to be higher with the distance. Therefore, we decided to develop a website that could provide an easy and convenient way for people to order Japanese dishes and have them delivered straight to their doorstep. Our goal is to offer a diverse range of traditional Japanese dishes made with fresh, locally sourced ingredients and with the expertise of professional Japanese chefs, giving people a taste of Japan from the comfort of their own homes.

After deciding on the project, we looked at existing food delivery websites to ensure that we have a clearer idea of the concept on what we wanted on the website. We then decided on the details of the website, such as the menu and the pricing. We sketched up a prototype to further clarify the overall layout and colour scheme of the website. Roles and responsibilities were distributed, and we used WhatsApp as the main form of communication.

The project is built using numerous tools such as HTML, CSS, JavaScript, PHP, MySQL as well as WampServer. A text-editor is also used to write the code.

HTML is the standard markup language used for creating web pages and applications. It provides a basic structure for web pages, defining text, images, links, and other elements, allowing us to determine the contents of the website. CSS is a stylesheet language used to describe the visual presentation of web pages. It is used to determine the style and colours of the HTML elements, allowing us to modify the website to match our chosen colour palette and objective, which is to make it more visually appealing and user-friendly. JavaScript is a programming language that is used to create interactive and dynamic web pages. It can be used to manipulate HTML and CSS, allowing the website to seem more polished. Furthermore, it is paramount in allowing user interactions, in which users can navigate and select the menu dishes. Furthermore, complex calculations like calculating the total price of the order can be done using JavaScript as well.

PHP is a server-side scripting language used for creating dynamic web pages and applications. It is commonly used in conjunction with MySQL databases and will be used to interact with the database for handling the database. MySQL is a relational database management system used

for storing, organizing, and managing data. It will be used to store information about the food, the users, feedbacks, orders and cart. WampServer is a software bundle used for local web development. It includes the Apache web server, MySQL database, and PHP. Our team will be testing our website using this software to ensure that the website is exactly as we envisioned. Each of our team members have their own preferred text editor to write the code.

## Databases

food

Data	Type	Key
id	int	PRIMARY KEY
food_name	varchar	
food_category	varchar	
food_description	text	
food_price	Float	
food_image_location	varchar	
food_code	varchar	
food_qty	int	

The food table stores food details that can be displayed on the website.

cart

Data	Type	Key
id	int	PRIMARY KEY
food_name	varchar	
food_category	varchar	
food_description	text	
food_price	Float	
food_image_location	varchar	
food_code	varchar	
food_qty	int	

The cart table stores the food that the user has selected when the user is ordering.

## orders

Data	Type	Key
id	int	PRIMARY KEY
name	varchar	
email	varchar	
phone	text	
address	varchar	
pmode	varchar	
foods	varchar	
amount_paid	varchar	

The orders table stores the orders which has been placed.

## useraccount

Data	Type	Key
userid	int	PRIMARY KEY
name	varchar	
email	varchar	
password	varchar	

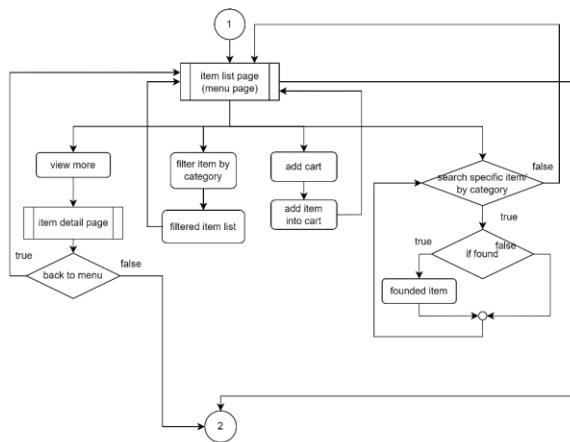

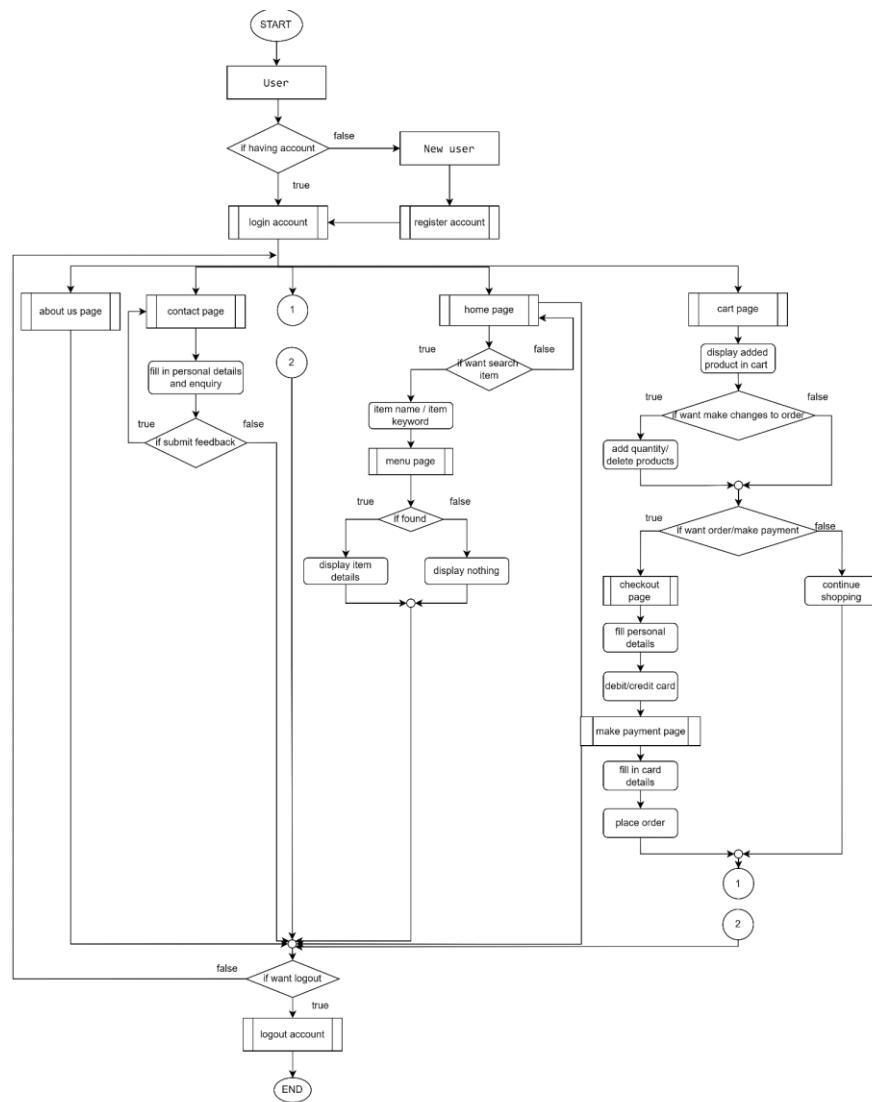

The useraccount stores the user login details.

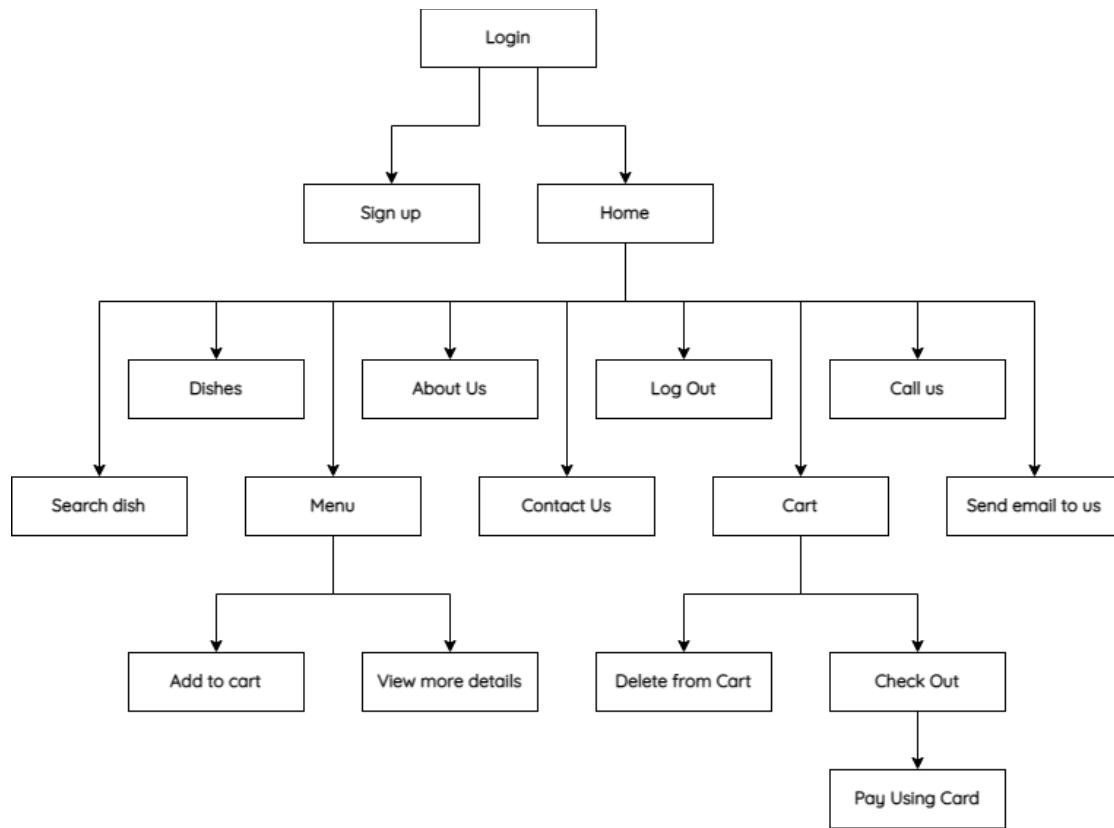

## feedback

Data	Type	Key
Id	int	PRIMARY KEY
name	varchar	
email	varchar	
Phone	varchar	
type	char	
Subject	text	

The feedback table stores the feedbacks that customers have submitted on the website.

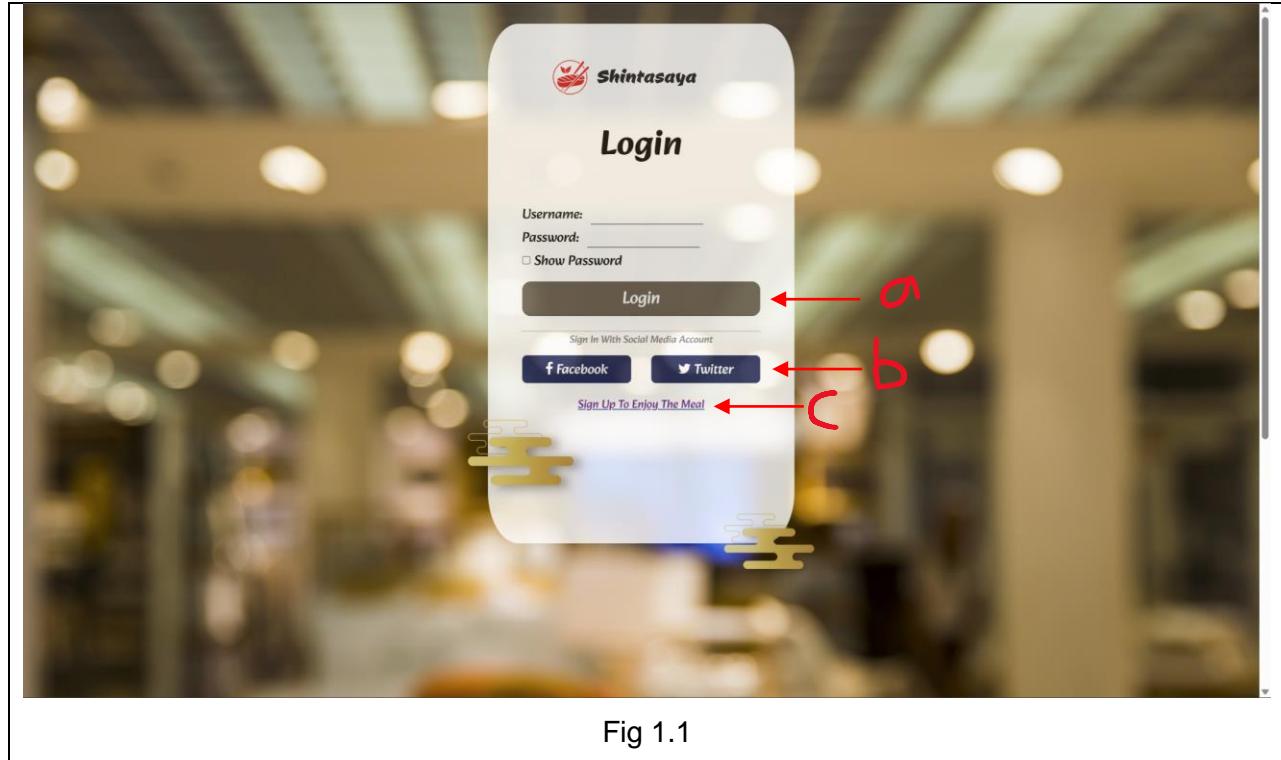

## Flow Chart Diagram

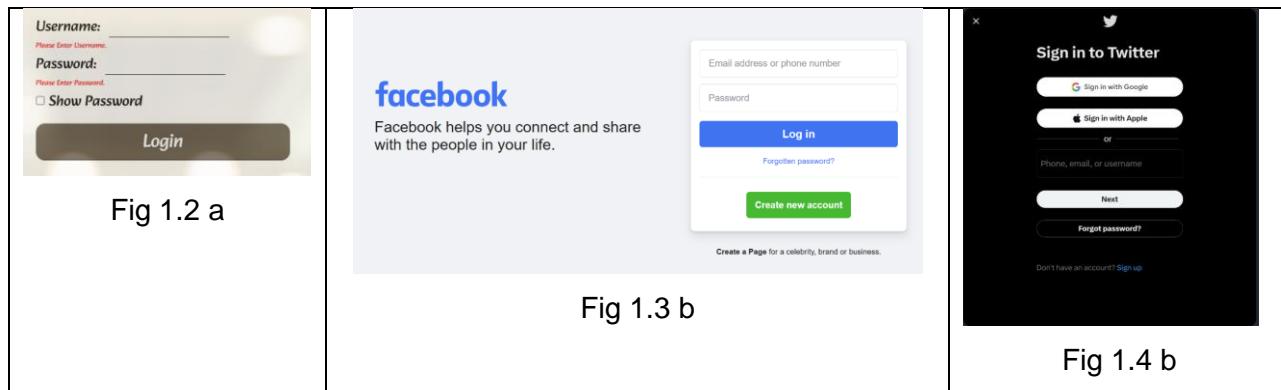

## Storyboard

Upon entering the website, the user will be shown the login screen for the restaurant.

Here, the user can choose to either:

- Login to the website after keying in their username and password and pressing the Login button.
- Login with either their Facebook or Twitter account by clicking either of the two buttons.
- Create a new account by clicking the 'Sign Up' link.

Clicking the Login button without putting any credentials will display a warning for the user to input whichever field is missing.

The other two buttons will redirect the user to either Facebook or Twitter to log into their account and use that account for the restaurant website.

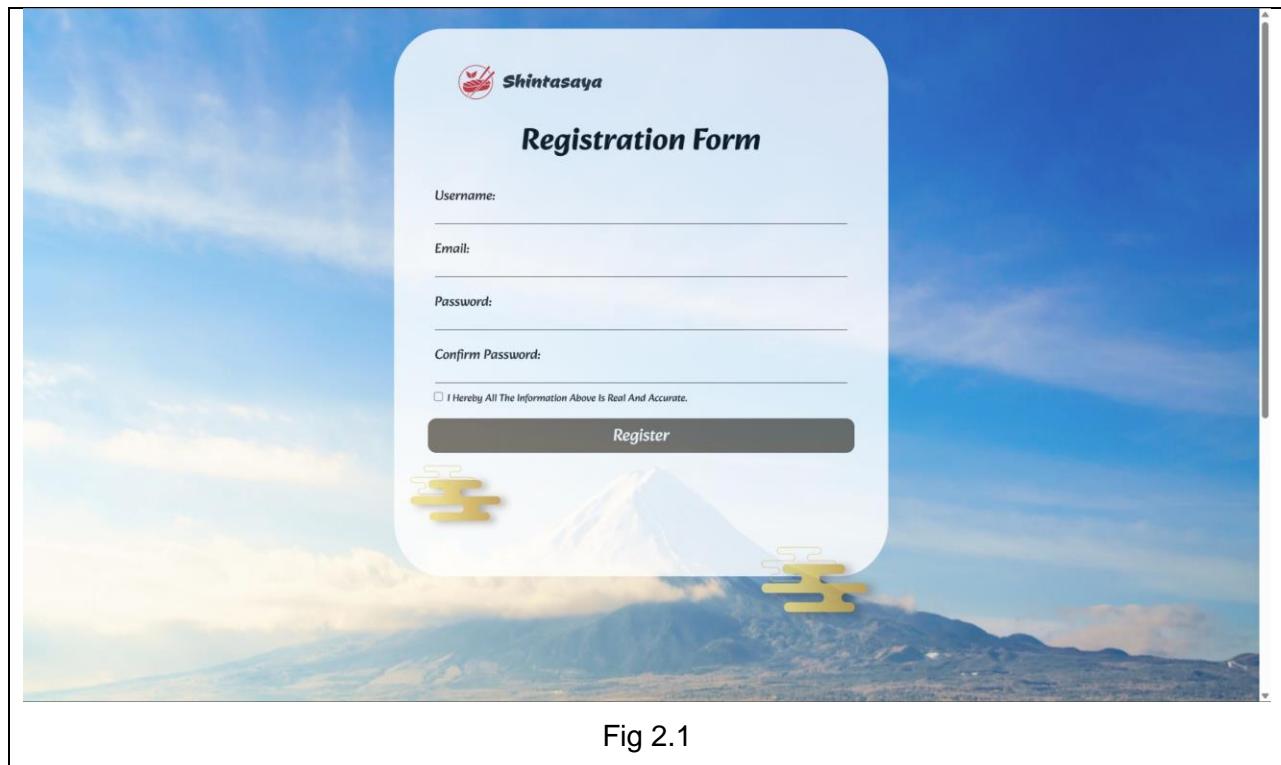

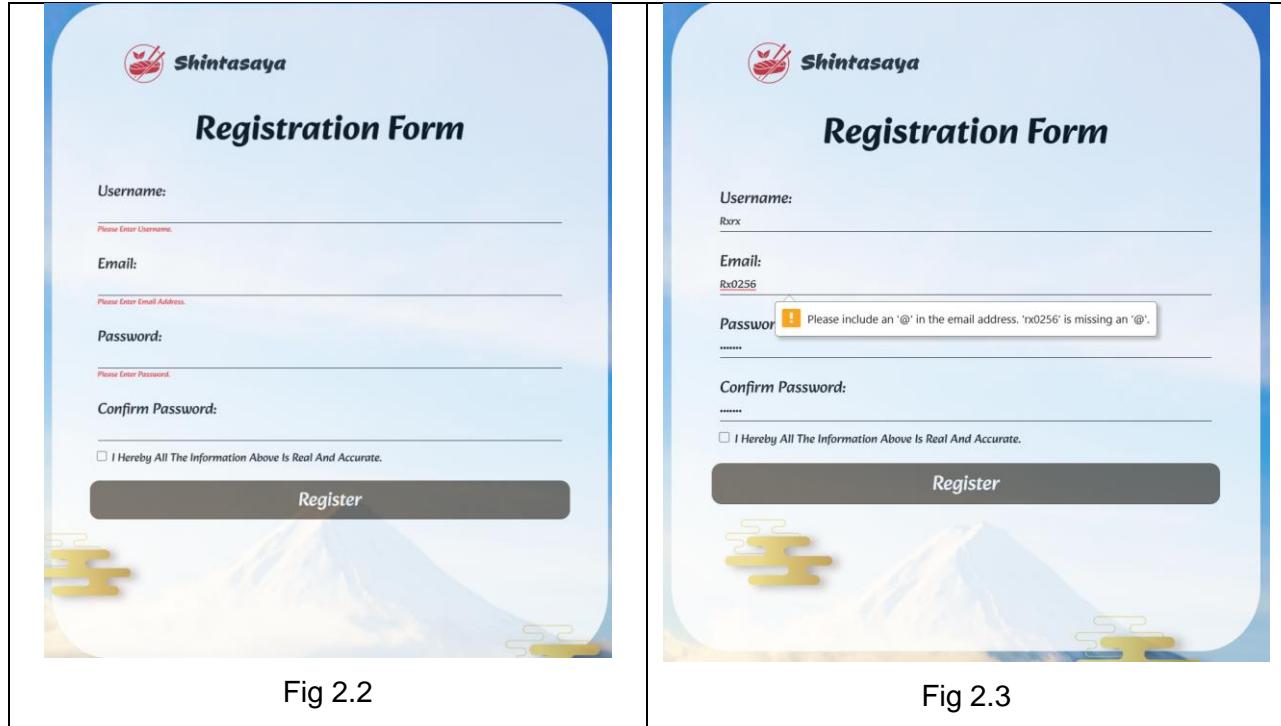

Fig 2.1

Clicking on the 'Sign Up' button (c) in Fig 1.1 will redirect the user to Fig 2.1, which is the page to register for an account for the restaurant.

Invalid username or password.  
Please try again.

**Login**

Fig 2.5

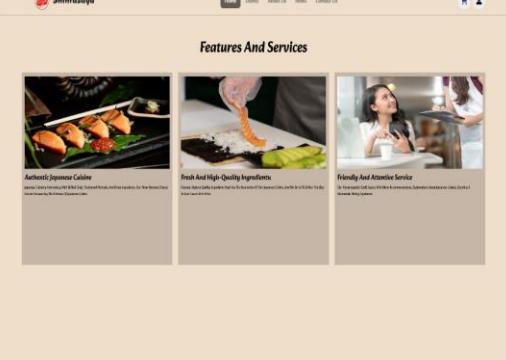

Fig 2.6

The user can then login with the account they created. They can also click on the show password to see the password typed. If the account username or password does not match in database, then it will inform the user as per Fig 2.6. Successful login will direct the user to the Home page as shown in Fig 3.1.

Upon logging in, the user will be redirected to the 'Home' page (Fig 3.1), where a plethora of options are available to them.

- Our specialties will be displayed here, displaying the dish, description, and picture. After a certain amount of time, it will scroll to the next specialty and the user can swipe left to go back to the previous specialty dish or right to see the next one.  
The user can press the 'Order Now' button which will direct them to the 'Menu' page where they can order.
- On top lies the navigation bar, where the user can use to navigate to the 'Dishes', 'About Us', 'Menu', and 'Contact Us' page.
- The Cart and User icons are located here. The user can click the Cart icon to see what they have currently ordered and clicking on the 'user' icon provides the user with the option to logout.
- The search bar can be used by the customer to search for any dishes that the restaurant provides and directing the user to the 'Menu' page.

**Features And Services**

**Authentic Japanese Cuisine**  
We Take Pride In Using Only The Finest, Freshest, And Highest-Quality Ingredients For Our Dishes. Our Chefs Carefully Select Each Ingredient To Ensure That Every Dish Is Of The Highest Quality And Flavor. We Believe That Quality Of Ingredients Is The Foundation Of Great Japanese Cuisine, And We Strive To Deliver The Best To Our Guests.

**Friendly And Attentive Service**  
Our Staff Is Trained To Provide Excellent Customer Service. We Believe That A Positive Atmosphere Is Key To A Great Dining Experience. Our Staff Is Always Ready To Answer Any Questions You May Have And To Ensure That You Have A Great Time.

Fig 3.4

Fig 3.5

Scrolling further down the 'Home' page, the website displays details of our staff working at the restaurant. Just like the Features and Services, the user can hover over the staff they are interested in to view their qualifications.

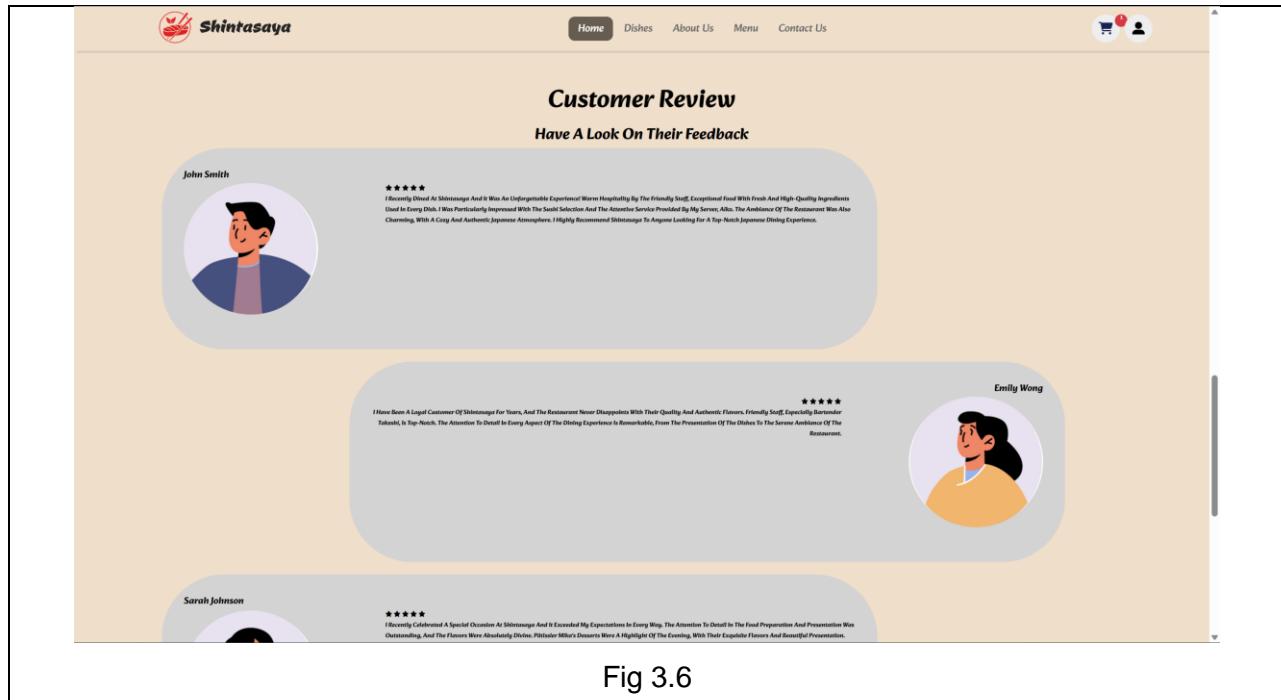

Fig 3.6

Scrolling further down, the website displays reviews written by very real people who have dined at our totally real restaurant.

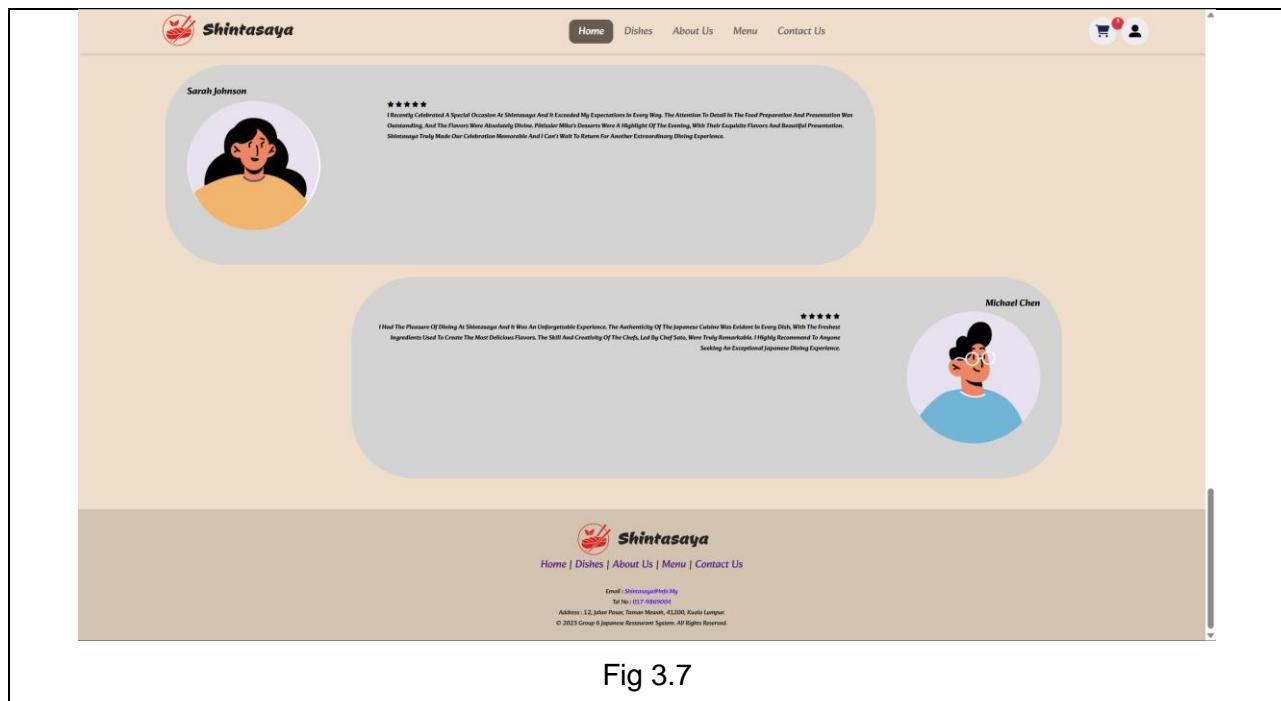

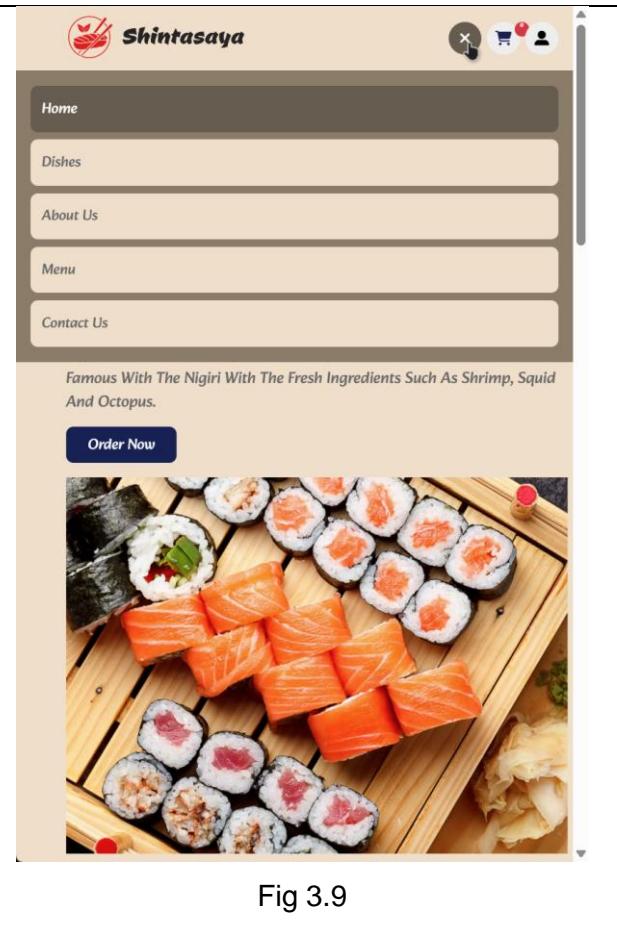

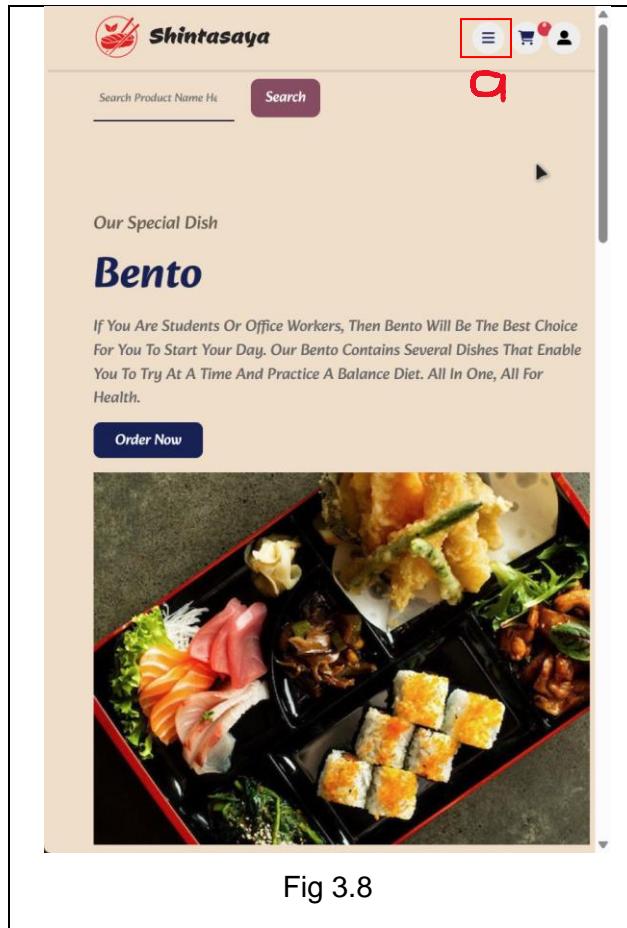

Fig 3.7

Finally, at the very bottom of the home page lies the footer which displays the Navigation bar which the user can use to navigate to other pages. Contact details for our restaurant are also located here, as well as the address.

With accessibility in mind, the website is dynamically designed to allow for screens of all types. The images and text will adjust scale according to the screen size detected. The navigation bar will change into a drop-down list which the user can click on to navigate as shown in Fig 3.9.

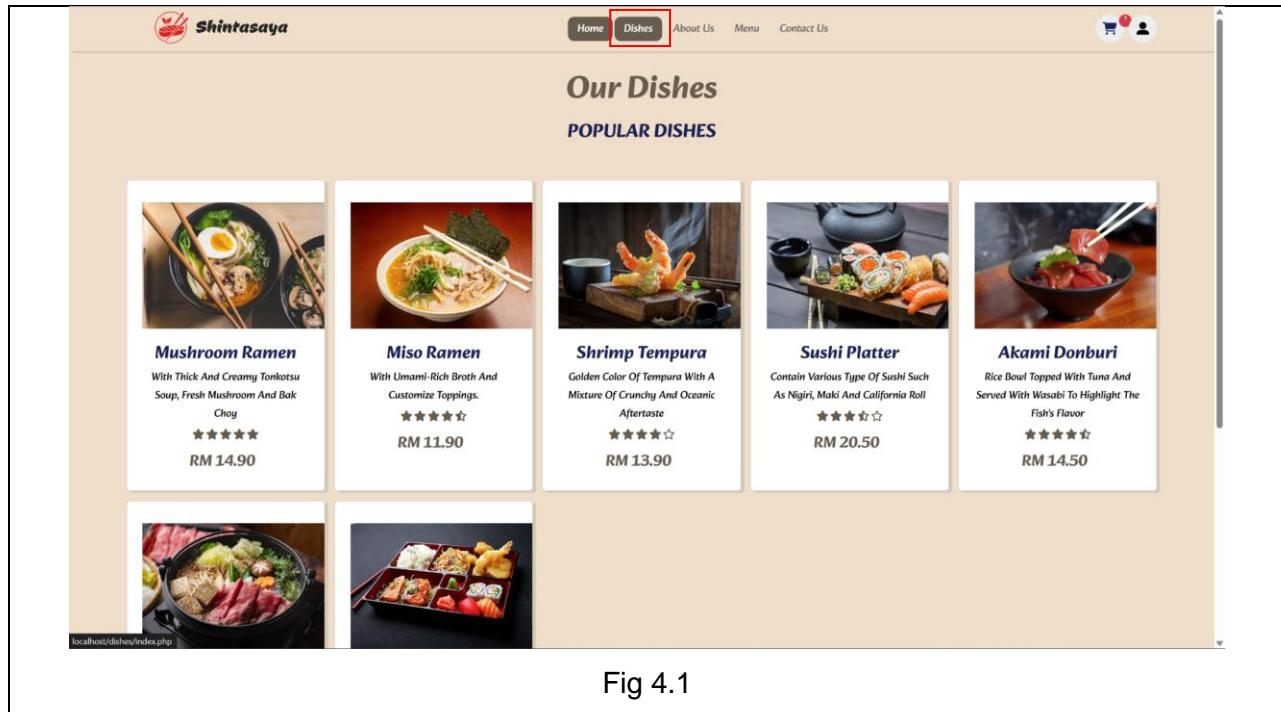

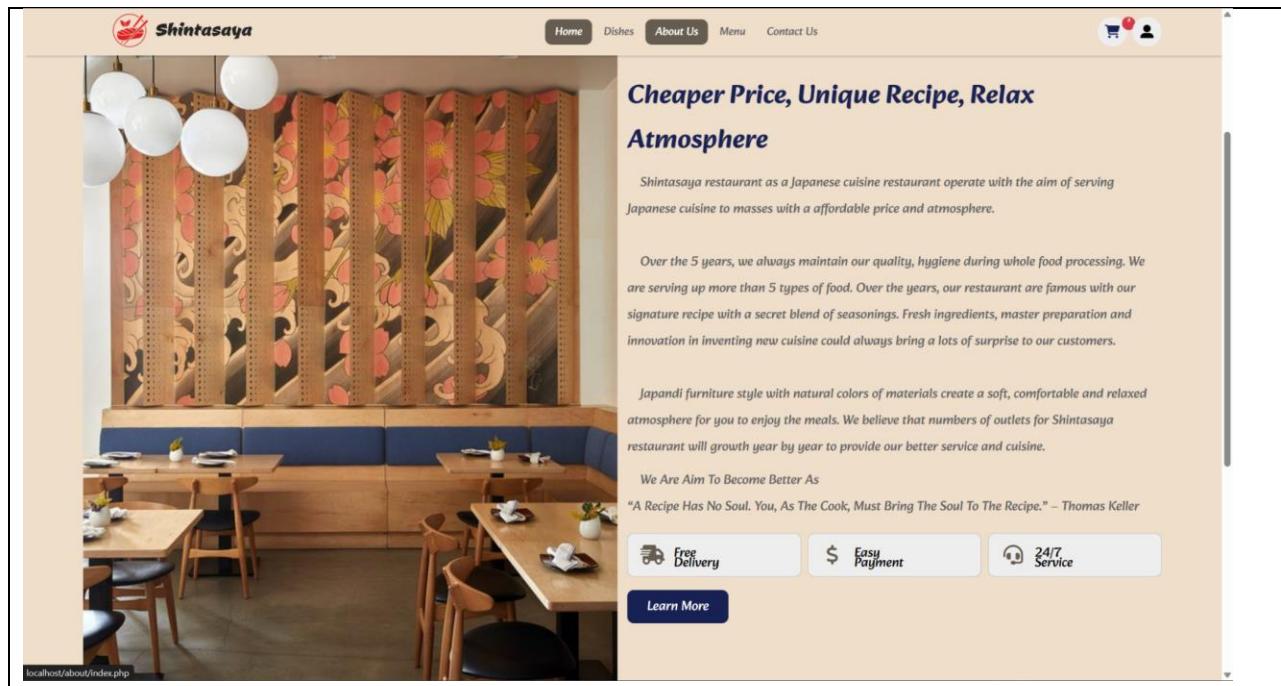

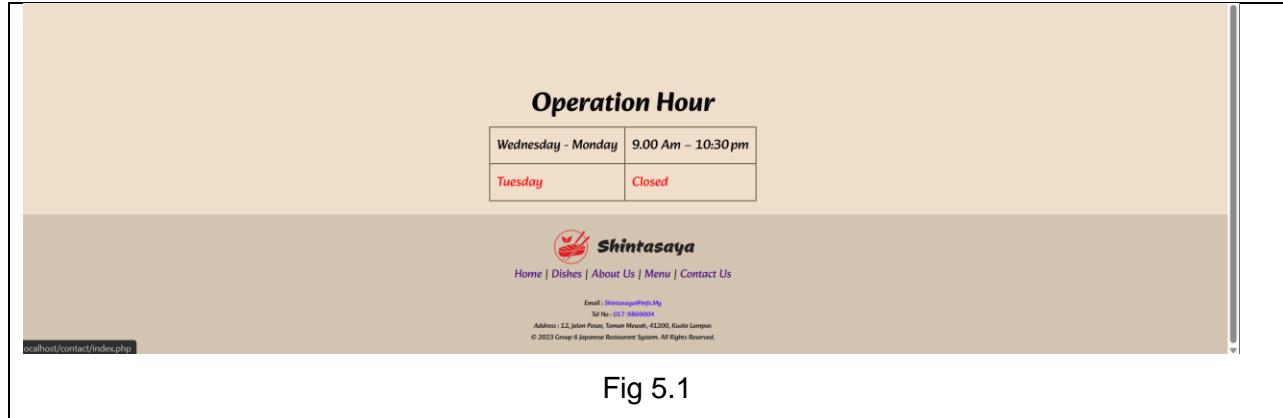

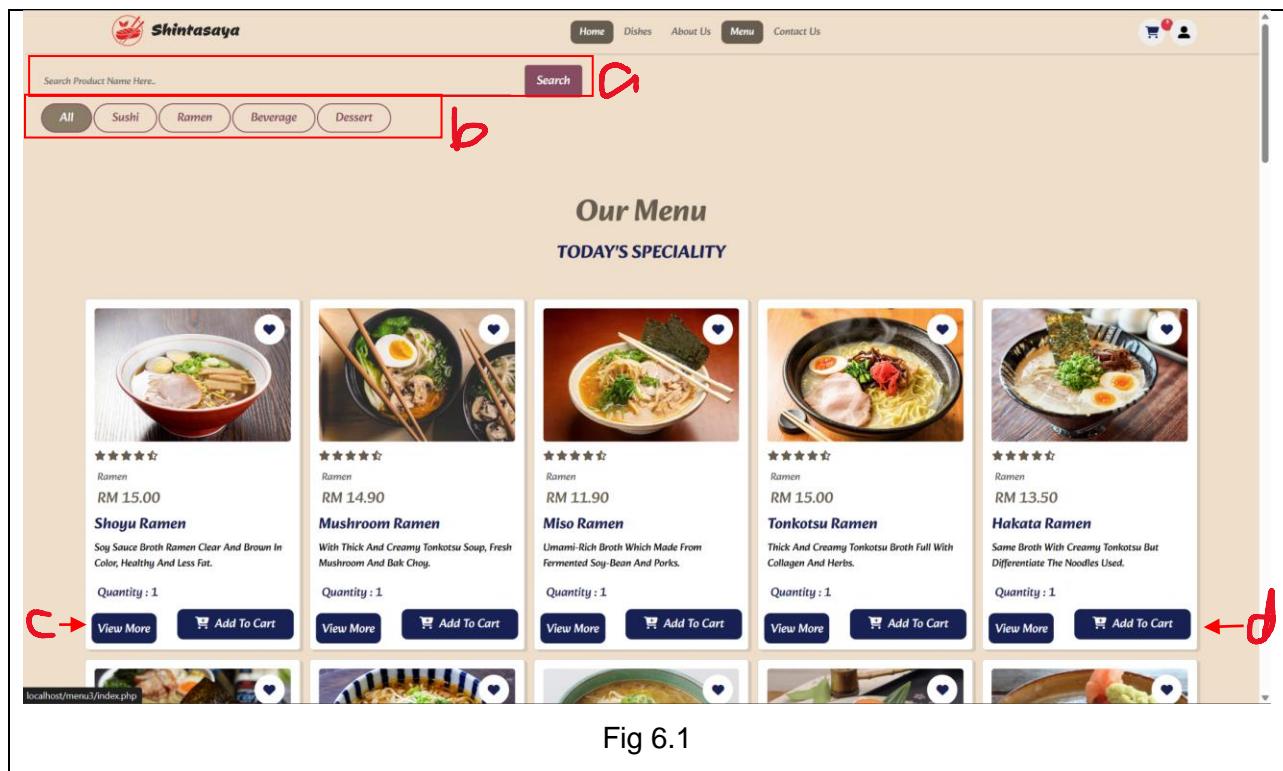

Fig 4.1

The user can find the Our Dishes page by clicking on the 'Dishes' button at the top of the page in the navigation bar or at the bottom of the page in Fig 3.7. As shown in Fig 4.1, the page displays popular dishes or specialty dishes which we recommend to users.

The 'About Us' page in Fig 5.1 can be reached by clicking on the 'About Us' button at the top of the page in the navigation bar or at the footer at the bottom of the page. The page displays more information about our restaurant on how it is run and our vision. Further down the page displays the operating hours that our restaurant abides to.

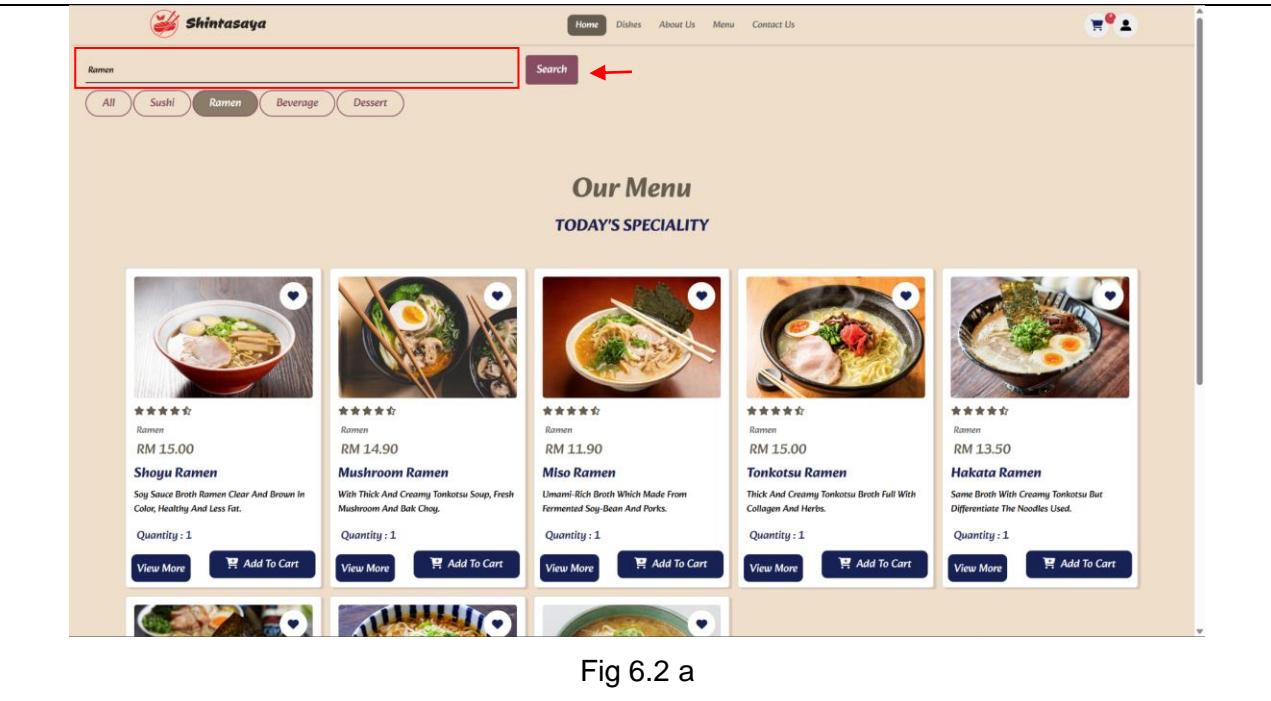

Clicking on the 'Menu' button at the header or footer will direct the user to the 'Menu' page as shown in Fig 6.1. This page can also be reached by using the Search function (a) present in the 'Home' page as shown in Fig 3.1 d.

The user can also filter the menu by food type by clicking on any of the buttons (b) here as shown in Fig 6.3 b.

The 'View More' button (c) displays more information about the dish as per Fig 6.4 c below.

The user can also click the 'Add To Cart' button (d) to add the dish they desire to the cart.

The screenshot shows a web browser displaying the Shintasaya website. At the top, there is a navigation bar with links for Home, Dishes, About Us, Menu, and Contact Us. On the far right of the navigation bar, there is a shopping cart icon with a red notification badge showing the number '3'. Below the navigation bar, there is a search bar with the text 'Ramen' and a 'Search' button with a magnifying glass icon. A red arrow points to the 'Search' button. Below the search bar, there is a horizontal menu with buttons for All, Sushi, Ramen (which is highlighted in dark grey), Beverage, and Dessert. The main content area is titled 'Our Menu' and 'TODAY'S SPECIALITY'. It displays five ramen dishes with their names, descriptions, prices, and 'View More' and 'Add To Cart' buttons. Each dish has a small image, a star rating, and a quantity selector (set to 1). The dishes are: Shoyu Ramen, Mushroom Ramen, Miso Ramen, Tonkotsu Ramen, and Hakata Ramen. The 'View More' and 'Add To Cart' buttons are blue with white text.

Fig 6.2 a

The user can search for any dish by inputting the name or a part of the name of the dish and clicking the search button. This will filter out dishes which will be displayed in the webpage.

**Our Menu**

**TODAY'S SPECIALITY**

Item	Rating	Price	Description	Quantity	View More	Add To Cart
Mochi Ice Cream	★★★★★	RM 8.50	Small Round Rice Cake With Ice Cream Inside	1	<a href="#">View More</a>	<a href="#">Add To Cart</a>

**Make Payment**

Fig 9.2

Fig 9.3

The website will prompt the user to fill out the field if it detects it is empty when the Make Payment button is pressed as shown in Fig 9.2.

23 | Page

If all the information is valid, upon clicking the Make Payment button, the page will go to Fig 9.4, which shows the order details.

**Fig 9.4**

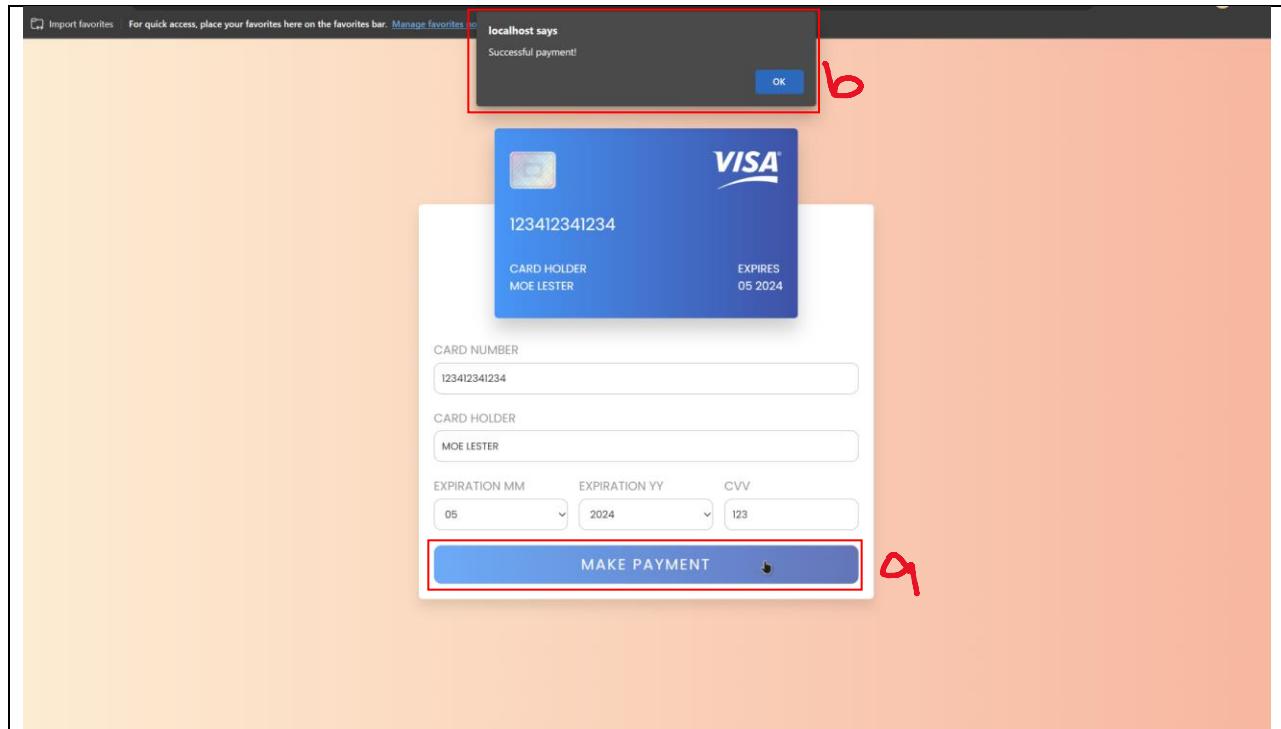

**Fig 9.5**

Clicking on the Make Payment button again in Fig 9.4 will direct the user to key in their card details as shown in Fig 9.5.

**Fig 9.6**

**Fig 9.7**

The user can key in their card number (a), card holder name (b), expiration month (c) and expiration year (d) by using the dropdown menu and key in the cvv (e).

The user can then press the Make Payment button (a) and an alert will pop up informing the user whether the payment was successful or not (b).

They will then be redirected back to the 'Menu' page .

## Responsive Design

As previously mentioned, we wish for the website to be easily accessible and usable by everyone so users with different screen sizes are taken into account when designing the site. The pictures, text and elements will adjust and scale themselves to match the resolution. Below showcases the pages shown above in another screen resolution.

## Conclusion

In conclusion, developing this Japanese cuisine food delivery website has been a challenging and rewarding experience for each one of us. Through this project, we learnt how to collaborate and work together in order to complete the project. Merging the project was one of the most daunting tasks and we have learnt to standardise our coding styles to ensure that this process would be less stressful. Furthermore, we have gained valuable skills in web development, particularly in using tools such as HTML, CSS, JavaScript, PHP, MySQL, and WampServer. We have also learned a great deal about the Japanese cuisine industry and how to provide customers with an authentic and high-quality experience. Going forward, we plan to continue to improve and expand our platform, incorporating new features to make it simpler for customers to order as well as to expand our menu offerings to meet the evolving needs of our customers.

## Workload Summary

Name	Responsibility
Chin Rou Xing	Responsible for combining all the parts and CSS Responsible for database table
Lim Sin Kai	Responsible for Cart/Wishlist page Compiling and documentation of the project
Ricky Tang Ruey Horng	Responsible for home page and navigation menu
Wong Ke Xin	Responsible for item list page, item details page and order page
Yap Chia Hau	Responsible for contact page, login page and register page
